Administrative Services

PCAB Update- 10/20/26

Jacqueline Collins, Vice President, Administrative Services (Acting)

Facilities is Joining Mesa – November 2026!

What This Means for Our Campus

What Does This Mean for Mesa?

Stronger Campus Connections

Facilities staff become part of the Mesa community, building relationships with faculty, classified professionals, administrators, and students.

Improved Coordination

Closer work with Administrative Services aligns maintenance with campus priorities, instructional needs, and daily operations.

Greater Responsiveness

Better communication helps us spot emerging needs and respond to facilities concerns more effectively.

Clearer Accountability

Clear expectations, communication channels, and processes for tracking and addressing facilities requests.

More Proactive Planning

Conversations about preventive maintenance, campus improvements, accessibility, and long-term facilities needs.

What Stays the Same?

We continue to partner with District Facilities

The campus will keep working collaboratively with District Facilities on projects, services, and responsibilities that remain under District oversight.

Setting expectations

This transition does not mean every facilities concern can be resolved immediately, or that all facilities funding decisions will be made at the campus level.

What's Next?

As we prepare for the transition, we will focus on:

01

Clarify roles

Define roles and responsibilities between the campus and District Facilities.

02

Set communication protocols

Establish how requests and updates move between Facilities and the campus.

03

Welcome our colleagues

Make sure Facilities colleagues feel welcomed and supported as members of the Mesa community.

PPIS (aka IELM) Funding

We received an updated version (v4) of the FY 2026–27 Adopted Categorical Funding Allocations from the District Office.

Mesa's allocation = $554,613!

Safety Week

Led by our CCERT trainers, we hosted three safety trainings: Fire Safety, CPR/AED, and First Aid/Evacuation Stair Chair, averaging 10 trainees per session. Thank you to everyone who signed up!

AED Campus Map Locations

44 AEDs across campus are now visible on the Mesa College 3D map, each including a brief description to help locate the device.

Safety Fair

On October 15th, we hosted our annual Safety Fair, featuring a Search and Rescue (SAR) vehicle, a crash car demonstration, CPR/AED training, and The Student Red Cross club. In partnership with SDCCD Police, we also hosted "Coffee with a Cop" alongside DUI driving and sobriety test simulations.

Thank you Yolanda!
